Art Unit: 1722

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A, second vent means comprised of "fine unevenness", claims 1-11; and

Species B, second vent means comprised of "fine apertures", claims 12-21.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

A. IF APPLICANT ELECTS SPECIES A, a further election of species of second vent means will be required, as follows:

Species A1, narrow grooves, claims 2-3;

Species A2, air passage along root portion of narrow rib, claims 4-5;

Species A3, plural narrow grooves and intersecting groove, claims 6-7; and

Species A4, recesses formed by surface treatment, claim 8.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 9-11 are generic to Species A1-A4.

B. IF APPLICANT ELECTS SPECIES B, a further election of species of fine apertures will be required, as follows:

Species B1, air-permeable sintered plate member, claims 13-14;

Species B2, narrow clearance around an insert member, claims 15-16; and

Species B3, slit-like aperture in top surface of tubular pin member, claims 17-18.

Art Unit: 1722

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 12, 19-21 are generic to Species B1-B3.

2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
